Testing Programme Summary

The period under review in this report is 1 October – 31 December 2022. During this time, the domestic and international Anti-Doping Testing Programme carried out 2353 tests.

For the purposes of this report, UK Anti-Doping defines a test as any attempt to test a single athlete in a single Sample Collection Session. If multiple samples (blood and/or urine) are collected from an athlete in a single Sample Collection Session, this is only counted as one successful test. If the athlete is not located or unavailable for testing, this is defined as one unsuccessful test attempt, regardless of the number of planned samples to be collected from that athlete.

The following table displays the outcome of these tests:

Testing Programme Summary

Successful Tests – Quarter 3	2136
Unsuccessful Test Attempts – Quarter 3	217
Total number of Tests – Quarter 3	2353
Additional Samples collected – Quarter 3 ^a	18
Year to date summary	
Total number of Tests	6523
Total number of successful Tests	5845

^a Additional samples collected when the Specific Gravity (SG) of the first sample is out of range, or for other reason.

Of the 2353 Tests in Quarter 3, 529 were attempted under the jurisdiction of an International Federation or other Anti-Doping Organisation.

Adverse Analytical Findings

Adverse Analytical Findings (AAFs) are defined in the World Anti-Doping Code as “a report from a WADA-accredited laboratory or other WADA-approved laboratory that, consistent with the International Standard for Laboratories, establishes in a Sample the presence of a Prohibited Substance or its Metabolites or Markers or evidence of the use of a Prohibited Method.”

During the period of 1 October – 31 December 2022, 12 AAFs were reported.

This figure may not be identical to the number of Anti-Doping Rule Violations (ADRVs) for the same period. This is because the detection of an AAF does not automatically lead to an ADRV for several reasons; for example, an athlete may have a Therapeutic Use Exemption (TUE) for a Prohibited Substance to address a legitimate medical requirement or may have ingested the substance through a permitted route. Furthermore, there will of course be a period between the reporting of an AAF and a violation ultimately being proved (where applicable).

Anti-Doping Rule Violations

The following table details the categories of substance or rule violation for all closed cases publicly reported on the UK Anti-Doping website for the year to date (i.e. 1 April 2022 – 31 December 2022). Substances are grouped according to the categories outlined in the World Anti-Doping Agency 2022 Prohibited List. For further detail on individual cases, please refer to the [UK Anti-Doping website](#).

Substance Category or Rule Violation	Number of ADRVs	Percentage (%)
S1. Anabolic Agents	7	53.8%
S5. Diuretics and Masking Agents	1	7.7%
S6. Stimulants	1	7.7%
Multiple - Analytical	4	30.8%

Source data: All outcomes reported on the UK Anti-Doping website between 1 April 2022 – 31 December 2022.

Whereabouts Failures

In Quarter 3, UK Anti-Doping recorded nine confirmed Whereabouts Failures. There are two types of Whereabouts Failure: Missed Tests and Filing Failures.

Whereabouts Failure	Total
Missed Test	8
Filing Failure	1

For further details on Whereabouts, please refer to the '[Whereabouts and ADAMS](#)' section of the UK Anti-Doping Website.

Testing Programme: Summary by NGBs, IFs and Other NADOs

Between 1 October and 31 December 2022, 2353 Tests were attempted on behalf of 52 National Governing Bodies, International Federations and National Anti-Doping Organisations. Tests conducted during Quarter 3 included:

- The Football Association 882 Tests
- International Rugby League 268 Tests
- Rugby Football Union 177 Tests
- UK Athletics 112 Tests
- World Rugby 93 Tests
